# MAPPING SKILLS & COMPETENCIES

We engage with your teams to understand and map their unique capabilities and skills based on their knowledge, experiences & competencies

## LEARNING STRATEGIES & PATHWAYS

New hires, experienced teams, senior management, all have different learning needs. And organisations need to build capabilities to take on their next big hairy audacious goal, while ensuring that they are leveraging emerging technologies to improve efficiency and be more productive.

We help craft organisation & team level learning strategies with granular pathways & journeys at the individual level

Individual learning path: training 1

Personal strategic project 1

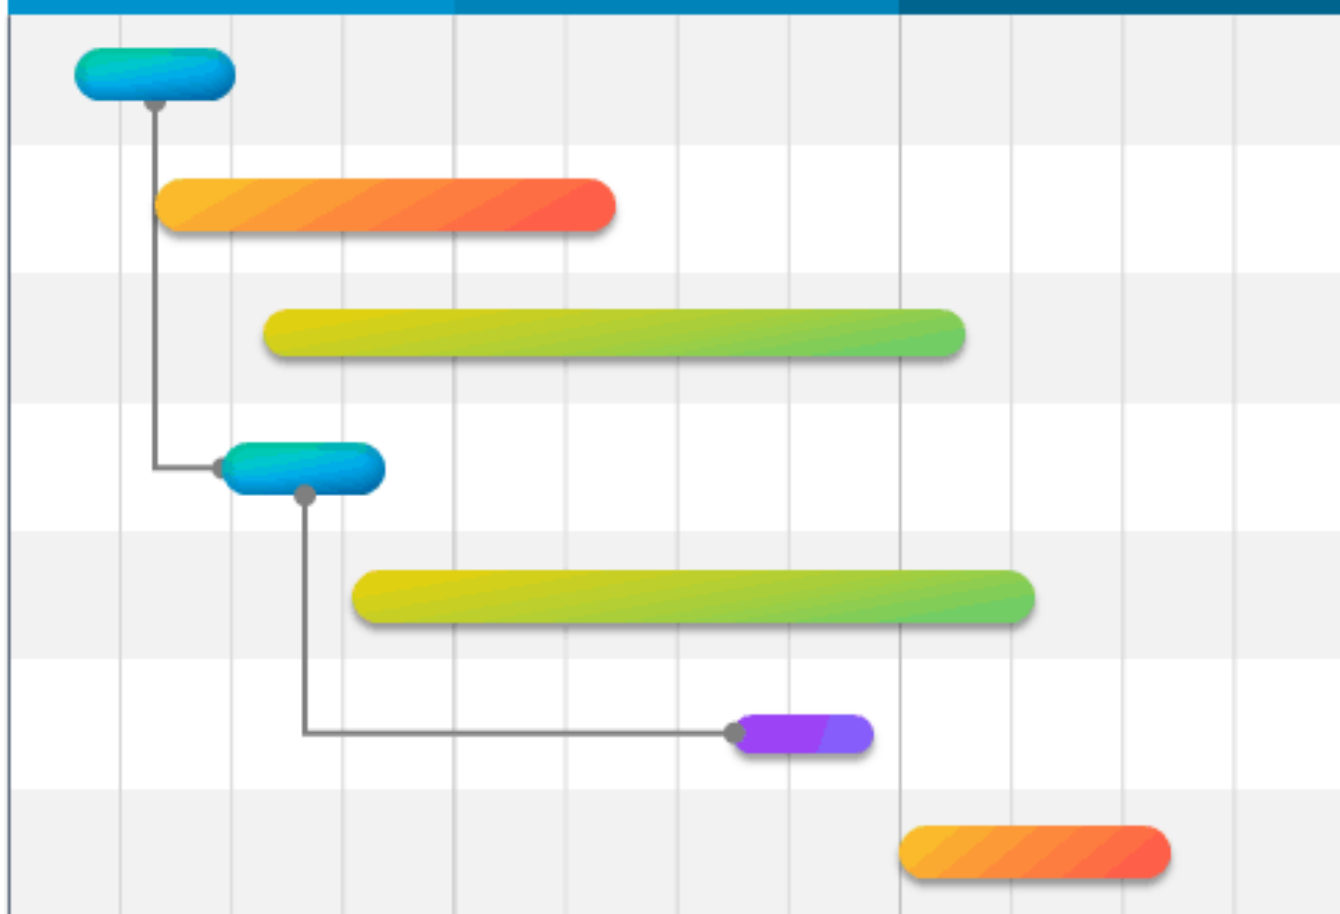

Personal strategic project 2

Individual learning path: training 2

Personal strategic project 3

Individual learning path: training 3

Personal strategic project 4

Specialised training for enhancement the career in the computer field

Training for enhancement the career in the current field

Peer-building project

Activities in the field of self-development

#### Resources' balance

Remember to check your workload, taking into account all strategic and ongoing projects.

# LEARN WHATEVER

It's no longer about what you know, but what you need to know

For executives, the ever-increasing pace of change can be especially demanding.

We're living in a world where the ability to learn and adapt faster than your competitors may be the only sustainable competitive advantage. Give them the edge with upskilling on these areas:

## SKILL DEVELOPMENT

Innovation | Technology | Data Science | Marketing | Finance  
Compliance | Human Resources | Customer Service | Logistics

## PERSONAL DEVELOPMENT

Leadership | Productivity | Communication | Interpersonal skills  
Public Speaking | Speed Reading | Lean Management | Design Thinking
